Screwdriver range

Industrial quality

Screwdriver range according to the new VDE Norm 1000 V IEC 60900:2004. All blades are made of high quality Molybdenum vanadium steel, black, red-covered, Polypropylen moulded. This ergonomic moulded 2-component handles from PP/TPE material guarantees a high security with normal power transmission. Every screwdriver is individually tested and marked according to the new VDE-Norm.

1 Homogeneous sizes-adaptation of the screwdrivers haft for better power transmission. Increase of the soft area for stronger grip

2 Exclusive, ergonomic design, non-slipping 2-component handles from PP/TPE material

3 Roll repressive

4 Injected blades profile on the top of the handle – for a fast access in the tool box, abrasion is not possible

5 with 1000 V marking injected

6 magnetic blade

An extra sliding protection of the Phillips profiles prohibits sliding out of the screw head

1000V IEC 60900:2004 GS

VDE 2-component screwdriver with PZ slot profile

Specifications and advantages of the PZ/FL profile.

The PZ/FL profile can only be used for combination screws that were previously screwed with a slot or recessed head PZ type screwdriver. **The screws have an inner PZ profile with an additional cross slot that also allows it to be screwed with a slot screwdriver.**

Area of application for PZ/FL profile

The screws are mainly used in electrical installation in automatic circuit breakers and safety switches
